- HR development
- Employment branding

Organisation and leadership

- Concepts of organisation
- Concepts of steering
- Strategic & Operative Management
- Methods & Systems for control, auditing and quality assurance

OUR OFFER TO INTERNATIONAL CLIENTS

Sweden has a long experience of professional elderly care. Both delivered by public institutions and delivered by private suppliers with public support. Our experience has gained us access to both best practices and learning experiences with different kinds of systems, suppliers and policies.

Swedish University Outreach is now able to share these experiences with international clients. We have a large network of people, representing different stakeholder perspective in this area. Ranging from suppliers, byers, policymakers, politicians and users to the researchers.

Our experience in setting up learning environments of capacity building programs will allow us to deliver first hand experiences and knowledge in a very effective and stimulating way. We offer programs and seminars in a wide range of areas (se left).

Contact us for a discussion about your needs and how we can set up a program that will enable your development.

Public procurement, ex:

- Keys to Sustainable Public Procurement
- Tools for successful contracts & delivery
- To understand the buyer/supplier roles
- To be a good byer
- Bid management
